6. A company's internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and

the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Inherent Limitations of Internal Financial Controls Over Financial Reporting

7. Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Opinion

8. In our opinion, the Company has, in all material respects, an adequate internal financial controls system over financial reporting and such internal financial controls over financial reporting were operating effectively as at March 31, 2018 based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India.

NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED MARCH 31, 2018

NOTE 1: Summary Of Significant Accounting Policies

A. Basis of preparation of financial statements

These financial statements have been prepared to comply with the accounting principles generally accepted in India, including the Accounting Standards specified under Section 133 of the Act, read with Rule 7 of the Companies (Accounts) Rules, 2014. The financial statements have been prepared on a going concern basis under the historical cost convention on accrual basis. The accounting policies have been consistently applied by the Company unless otherwise stated.

All assets and liabilities have been classified as current or non-current as per the Company's normal operating cycle and other criteria set out in the Schedule III to the Companies Act, 2013. Based on the nature of products and the time between the acquisition of assets for processing and their realisation in cash and cash equivalents, the Company has ascertained its operating cycle as 12 months for the purpose of current and non-current classification of assets and liabilities.

B. Use of estimates

The preparation of financial statements in conformity with generally accepted accounting principles requires estimates and assumptions to be made that affect the reported amount of assets and liabilities on the date of the financial statements and reported amounts of revenues and expenses during the reporting period. Differences between actual results and estimated are recognized in the period in which the results are known / materialized.

C. Revenue Recognition

Revenue from sale of goods is recognised on transfer of significant risks and rewards of ownership of the goods to the buyer. Sales of products are stated net of sales tax, returns, discounts and allowances.

Interest income are recognised on time proportion basis taking into account the amount outstanding and the applicable interest rate except, where the recovery is uncertain, in which case it is accounted for on receipt.

D. Other Income

Interest income is recognised on a time proportion basis taking into account the amount outstanding and the rate applicable.

Dividend is accounted when the right to receive payment is established

E. Fixed Assets

Tangible Fixed Assets are stated at actual cost of acquisition amounts or revalued amount, (as the case may be), less accumulated depreciation and impairment loss, if any. The cost of an item is its purchase price, including import duties and other non-refundable taxes or levies and any directly attributable cost of bringing the asset to its working condition for its intended use; any trade discounts and rebates are deducted in arriving at the purchase price.

Item of tangible fixed asset are added to its book value only if they increase the future benefits from the existing asset beyond its previously assessed standard of performance.

Tangible fixed assets under construction are disclosed as capital work-in-progress.

Losses arising from the retirement of, and gains or losses arising from disposal of fixed assets which are carried at cost are recognised in the Statement of Profit and Loss.

F. Depreciation

Depreciation on tangible assets is provided on the Straight Line Method (SLM) unless otherwise mentioned, pro-rata to the period of use of assets, based on the useful lives as specified in Part C of Schedule II to the Companies Act, 2013. Depreciation on assets acquired/ sold during the year is provided on prorata basis. Freehold land is not depreciated.

Depreciation on additions/ deletions to fixed assets is calculated pro-rata from/ up to the date of such additions/ deletions. Assets individually costing Rs. 5,000 or less are fully depreciated in the year of purchase.

G. Impairment of Fixed Assets:

Assessment is done at each Balance Sheet date as to whether there is any indication that an asset (tangible and intangible) may be impaired. For the purpose of assessing impairment, the smallest identifiable group of assets that generates cash inflows from continuing use that are largely independent of the cash inflows from other assets or groups of assets, is considered as a cash generating unit. If any such indication exists, an estimate of the recoverable amount of the asset/cash generating unit is made. Assets whose carrying value exceeds their recoverable amount are written down to the recoverable amount. Recoverable amount is higher of an asset's or cash generating unit's net selling price and its value in use. Value in use is the present value of estimated future cash flows expected to arise from the continuing use of an asset and from its disposal at the end of its useful life. Assessment is also done at each Balance Sheet date as to whether there is any indication that an impairment loss recognised for an asset in prior accounting periods may no longer exist or may have decreased.

H. Investments

Investments are classified into long term investments and current investments. Investments which are intended to be held for one year or more are classified as long term investments and investments which are intended to be held for less than one year are classified as current investments. Long term investments are carried at cost less other than any temporary diminution in value, determined separately for each investment. Current investments are carried at lower of cost or fair value. The comparison of cost and fair value is done separately in respect of each category of investment.

I. Inventories

Inventories are stated at the lower of cost or net realisable value. Cost includes product's invoice price, duties, vendor obligation, if any, and other expenses incurred to bring the inventories to their present condition and location. Costs of inventories are determined on the basis of First-In-First-Out ('FIFO') method.

J. Miscellaneous Expenditure

Preliminary expenditures are amortised in the year in which incurred.

K. Accounting for Taxation of Income

Tax expense for the period, comprising current tax and deferred tax, are included in the determination of the net profit or loss for the period. Current tax is measured at the amount expected to be paid to the tax authorities in accordance with the taxation laws prevailing in the respective jurisdictions.

Deferred tax is recognised for all the timing differences, subject to the consideration of prudence in respect of deferred tax assets. Deferred tax assets are recognised and carried forward only to the extent that there is a reasonable certainty that sufficient future taxable income will be available against which such deferred tax assets can be realised. Deferred tax assets and liabilities are measured using the tax rates and tax laws that have been enacted or substantively enacted by the Balance Sheet date. At each Balance Sheet date, the group reassesses unrecognized deferred tax assets, if any.

Current tax assets and current tax liabilities are offset when there is a legally enforceable right to set off the recognised amounts and there is an intention to settle the asset and the liability on a net basis. Deferred tax assets and deferred tax liabilities are offset when there is a legally enforceable right to set off assets against liabilities representing current tax and where the deferred tax assets and the deferred tax liabilities relate to taxes on income levied by the same governing taxation laws.

L. Accounting for Commodity Derivatives

Commodity Instruments are initially measured at cost, which is the fair value of whatever was paid or received to acquire the financial asset or liability. Transaction costs are included in the initial measurement of financial instruments. Subsequent to initial measurement, at each reporting date, all such instruments are re-measured to fair value (mark-to-market) with gains and losses recognized in the statement of profit and loss immediately. Gains or losses on settlement of Commodity Instruments during the year are recognized in the statement of profit and loss immediately.

M. Provisions and Contingent Liabilities

Provisions: Provisions are recognized when there is a present obligation as a result of a past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and there is a reliable estimate of the amount of the obligation. Provisions are measured at the best estimate of the expenditure required to settle the present obligation at the Balance sheet date and are not discounted to its present value.

Contingent Liabilities: Contingent liabilities are disclosed when there is a possible obligation arising from past events, the existence of which will be confirmed only by the occurrence or non occurrence of one or more uncertain future events not wholly within the control of the company or a present obligation that arises from past events where it is either not probable that an outflow of resources will be required to settle or a reliable estimate of the amount cannot be made.

N. Earnings Per Share

Basic earnings per share are calculated by dividing the net profit or loss for the period attributable to equity shareholders by the weighted average number of equity shares outstanding during the period. The weighted average number of equity shares outstanding during the period and for all periods presented is adjusted for events, such as bonus shares, other than the conversion of potential equity shares that have changed the number of equity shares outstanding, without a corresponding change in resources. For the purpose of calculating diluted earnings per share, the net profit or loss for the period attributable to equity shareholders and the weighted average number of shares outstanding during the period is adjusted for the effects of all dilutive potential equity shares.
